DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the v-shaped openings as set forth in claims 11-13 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. Claims 11-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not

described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly recited limitation in claim 11 setting forth that the inwardly projecting grooves are recessed into the edge of the first member with v-shaped openings is new matter to this application. No original disclosure of v-shaped openings can be found in the specification. Also, the openings as shown in the drawings are not v-shaped since the angled sides do not meet and the openings are not in the form of a "V".

3. Claims 11-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The application disclosure fails to describe how to make and use the interlock as is now claimed, i.e. with v-shaped openings. One cannot ascertain how this embodiment would be made and used to interlock the flaps.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Chidsey, Jr. et al (fig. 6 emb). Chidsey, Jr. et al discloses an interlocking mechanism including a trapezoidal tab cut from an edge of two opposing flaps or members. The tabs are each defined by grooves

Art Unit: 3782

projecting both inwardly toward each other and outwardly away from each other depending on whether one begins on the inside of the flap or on the outside of the flap. Also, the inward portion of each groove is substantially parallel to the edge of the blank as claimed. With respect to claims 12 and 13, it is noted that the tabs formed by the grooves on each side of one of the locking tabs are considered to be both cut "away from" and cut "toward" the lock tab insofar as they extend both toward and away from the tab insofar as claimed. With respect to the newly added limitation of v-shaped openings, it is noted that the sides of the openings in Chidsey, Jr. et al are angled as they extend inwardly from the outer edge of each panel similarly to that evidenced at the outer part of the openings in the invention.

Allowable Subject Matter

6. Claims 1, 3-6, 8-10, 14, 16 and 17 are allowed.

Response to Arguments

7. Applicant's arguments with respect to claims 11-13 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3782

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
